

Add Cengage/Webassign Content to your Scholar Course

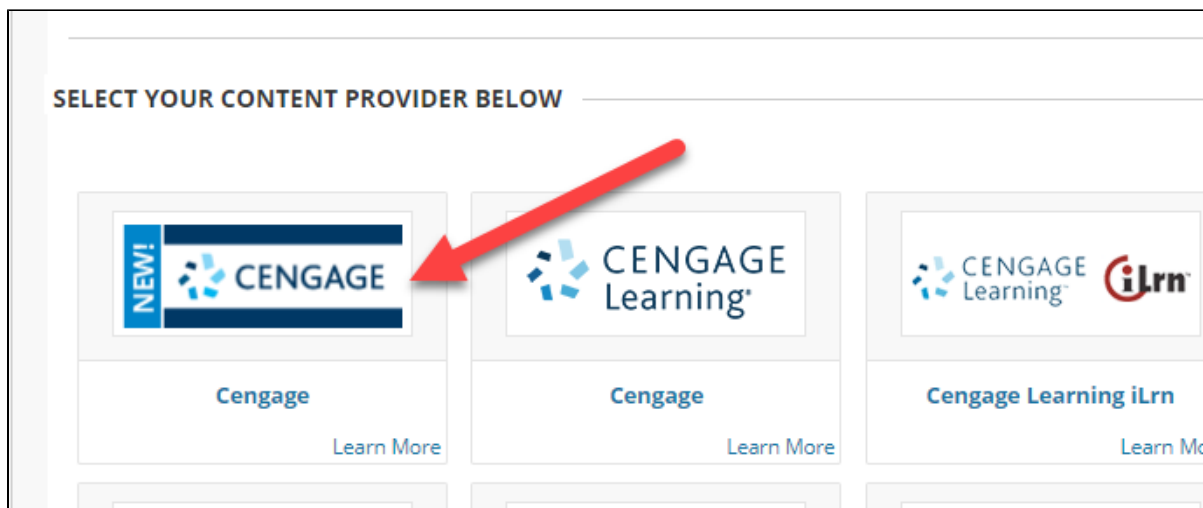

Cengage and WebAssign have integrations between their online platforms and Scholar. These integrations allow you and your students to access materials without remembering separate logins, lets you link to specific textbook sections or assignments and enables automatic syncing of grades back to Scholar.

To set up your Cengage or WebAssign integration, you should first contact your Cengage representative and ask them to associate the textbook or WebAssign materials with your account.

Then, go into the content area in which you'd like the first set of materials to appear. From the Partner Content menu, choose Content Market.

Select Cengage from the list.

Select the materials that you'd like to link.
