

Install Mathematica on my personal computer--Faculty

Faculty

Creating a Wolfram Account

Go to www.wolfram.com/siteinfo and enter your CNU email address.

You'll then receive an e-mail from Wolfram asking you to verify your e-mail address. Click on the link in the e-mail, and your account will be automatically verified. Once you've done that, proceed to the directions for your specific type of installation.

Obtain a License Key

Create an account using the instructions above. Then click on this link: http://www.wolfram.com/siteinfo/homeuse/?parent_license=L3300-6392&request_type=NEW_HU_LICENSE

The license key (L3300-6392) should be automatically filled in. If not, enter it in the field indicated. Then click Continue.
[blocked URL](#)

You will be asked the installation method and the operating system that you'll be using. Select either Download: Send it to me or CD Send it to me and the operating system of your home computer.

[blocked URL](#)

You'll then be taken to another screen where you'll need to enter in your personal information. At the bottom, you'll be asked to provide proof that you're an employee of CNU. If there's a public-facing website that contains a department directory, you can include that. Otherwise, you should e-mail proof to orders@wolfram.com.

It may take some time for you to get an approval message. Please do not submit repeated requests.

Installing Mathematica

Windows

Click the download link in your license key e-mail or log in to your Wolfram account. Then choose "Get Downloads". Click on the "Windows" download link for Mathematica Download Manager.

[blocked URL](#)

A window will pop up with information about your download. Click "Start Download".

[blocked URL](#)

When your download is complete, navigate to your downloads folder and double-click the "Mathematica" file.

[blocked URL](#)

You may be asked if you want to run the file. Choose "Run"

[blocked URL](#)

A box will pop up showing the progress of the download of Mathematica. You can do other things while you wait for the complete download.

[blocked URL](#)

When it finishes, click Launch.

[blocked URL](#)

The installer will then start. Click "Next >" four times (unless you have a compelling reason to change any of the settings presented).

.

[blocked URL](#)[blocked URL](#)[blocked URL](#)[blocked URL](#)

Then, click "Install"

[blocked URL](#)

Mathematica will begin installing on your computer. Click “Finish” to exit the installer.

The first time you run Mathematica, you'll be prompted for your activation key. Enter the key that you got during the key request process and press Activate. You'll need to be connected to the Internet to activate your software.

[blocked URL](#)

Accept the license agreement on the next page. You'll then be able to use Mathematica.

Macintosh

If you haven't already, you must allow applications from identified developers to run on your system. Click on the Apple menu and choose “System Preferences.”

[blocked URL](#)

Next, choose Security & Privacy.

[blocked URL](#)

Click the lock to allow editing of the preferences. You may have to enter your password.

[blocked URL](#)

Under “Allow applications downloaded from:,” choose “Mac App Store and identified developers”.

[blocked URL](#)

Close the window, and you're ready to start installing the software

Click the download link in your license key e-mail or log in to your Wolfram account. Then choose “Get Downloads”.

[blocked URL](#)

Click on the Macintosh Mathematica Download Manager download button:

[blocked URL](#)

A box will pop up asking you if that's what you want to download. Click Download.

[blocked URL](#)

Navigate to your download folder and double-click the Mathematica .dmg file.

[blocked URL](#)

Then, double-click the download manager.

[blocked URL](#)

Depending on your settings, you may get a warning. Choose “Open”.

[blocked URL](#)

Your download will start. You can do other things while it downloads.

[blocked URL](#)

When the download completes, click Launch.

[blocked URL](#)

The install window will come up. Drag the Mathematica symbol to the Applications folder symbol.

[blocked URL](#)

The Mathematica software will then install. You'll hear a sound indicating that the install is complete.

You'll be prompted for your activation key. Enter the key that you got during the key request process and press Activate. You'll need to be connected to the Internet to activate your software.

[blocked URL](#)

Accept the license agreement on the next page. You'll then be able to use Mathematica.
