

Setup a personal wireless access point

As outlined in the Residence Life Handbook, students are not allowed to have wireless routers or access points in their rooms.

ITS has a limited number of network switches available for those who need additional wired network ports. Switches will only be distributed when necessary to bring the number of network ports in a room to one per resident. Please contact the desk at (757)594-7079 or visit the Customer Service Desk in the 24/7 room of the Triple Library.
