

Add a clicker registration link to my class in Scholar

To make registration clear for students you should build a link to the tool in your Course Menu.

Select Add Menu Item.

Choose Tool Link.

This will bring up the Add Tool Link dialog box. Use the pull down menu next to Type to select Turning Account Registration. Type in a name that students will easily recognize. Then, check "Available to Users".

A screenshot of a dialog box titled 'Add Tool Link'. It has a white background and is overlaid on a grey background. The dialog box contains the following fields and controls: a 'Name:' label with an orange asterisk, a text input field containing 'Register Your Clicker'; a 'Type:' label, a dropdown menu showing 'Turning Account Registration' with a downward arrow; a checkbox labeled 'Available to Users' which is checked; and two buttons at the bottom right labeled 'Cancel' and 'Submit'. The background shows parts of the course menu, including a blue banner with 'Assignments' and a grey area with 'cements'.

Hit Submit.

At this point the registration tool has been added to your menu. Students can then follow the Clicker Registration Instructions to register.
