

Set Up VPN Access--Windows

Requesting VPN Access

[Please Click Here for VPN Access Instructions.](#)

Installing GlobalProtect

You will need admin rights to your home computer to install the Global Protect product. Launch your web browser and type <https://gpvpn.cnu.edu> into the address bar. Whichever browser you use, you will then see the following screen. Enter your CNU username in the "name" box, then your password in the Password box.

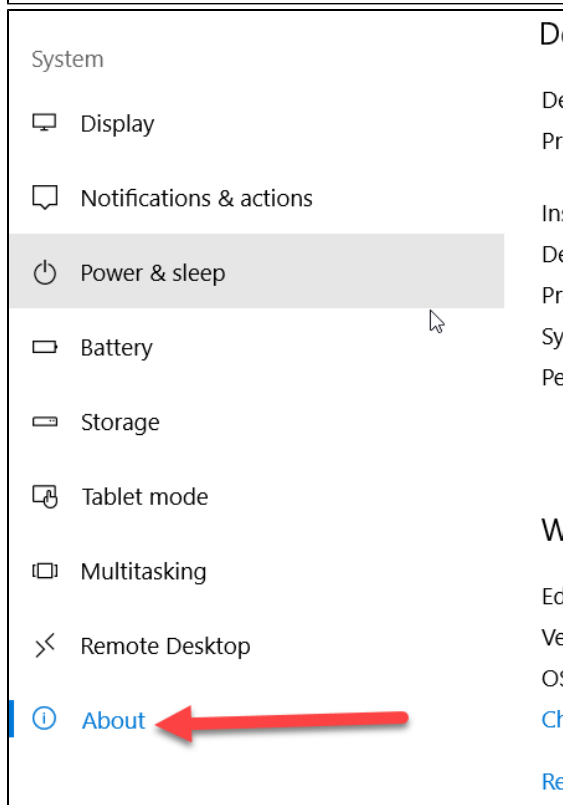

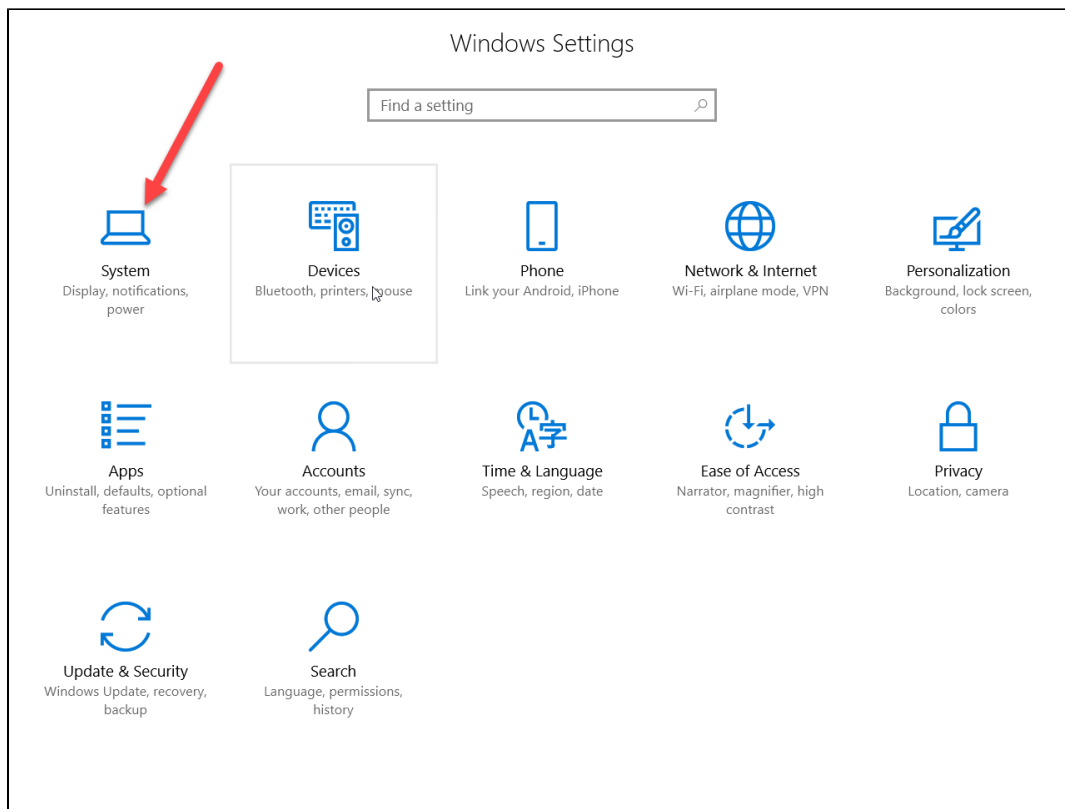

The screenshot shows the login portal for Christopher Newport University's Global Protect VPN. The title is "Christopher Newport University - GPvpn Portal". Below the title, there are two input fields: "Username" and "Password". The "Username" field contains the text "00" and has a small icon to its right. The "Password" field is filled with dots and also has a small icon to its right. Below these fields is a blue button labeled "LOG IN".

You'll then be asked to download the version of Global Protect that matches your system. To tell your system type, click on the start menu, and click on the Settings icon.

On the Control Panel that pops up, select System, then About.

In the screen that appears, you can find your system type (64 or 32 bit):

Device specifications

Device name	ITSDELG2ZCP72
Processor	Intel(R) Core(TM) i7-6820HQ CPU @ 2.70GHz 2.70 GHz
Installed RAM	16.0 GB (15.9 GB usable)
Device ID	5882985E-8C94-484E-ABCD-33A089852230
Product ID	00328-10000-00001-AA077
System type	64-bit operating system, x64-based processor
Pen and touch	No pen or touch input is available for this display

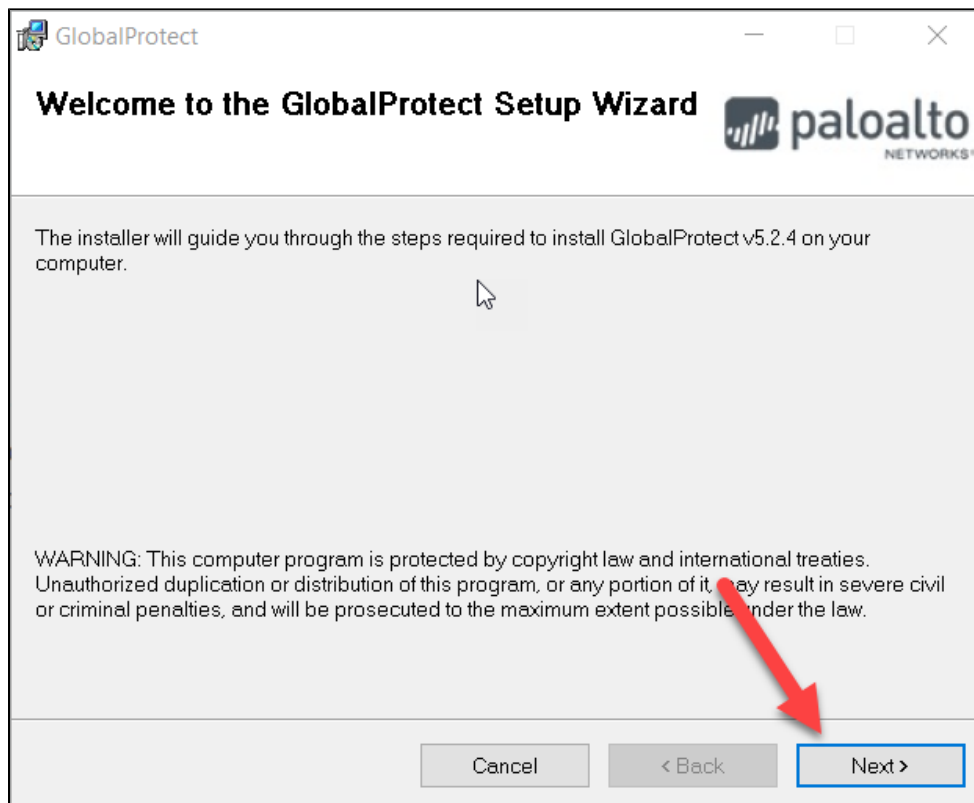

Close that window, and download the file appropriate to your system type.

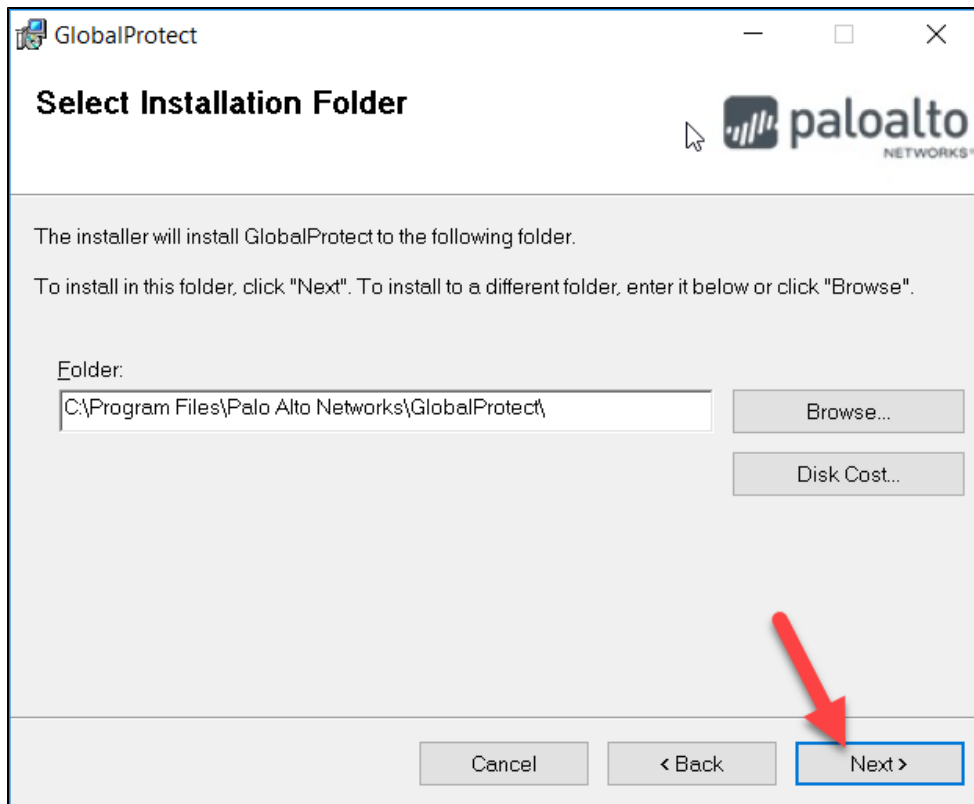

[blocked URL](#)

Double-click on the file to run it. A box will come up asking whether you want to run the file. Click "Run."

[blocked URL](#)

Click Next on the next three screens:

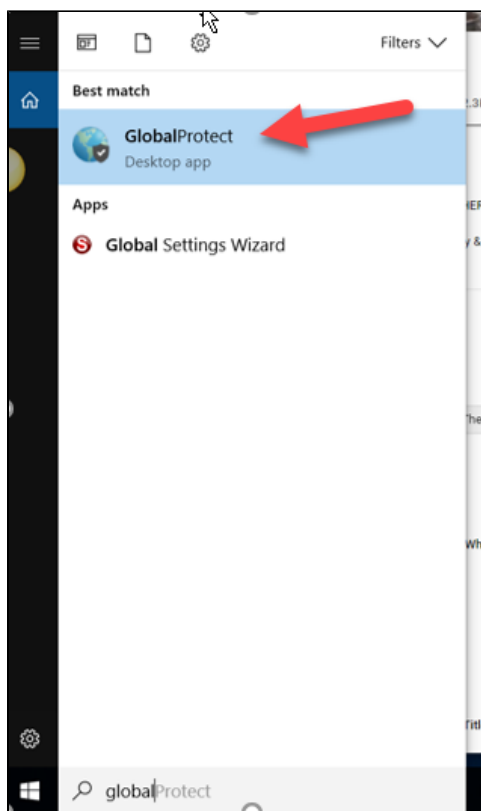

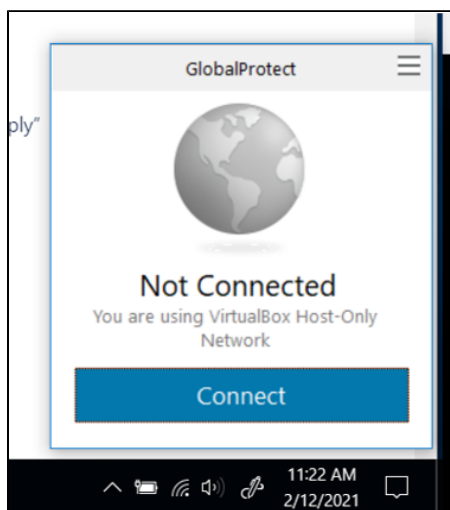

The program will be installed on your computer. Depending on your computer's setup, you may have to enter your admin username and password. Click Complete when the client is done installing.

Accessing GlobalProtect

To access the client, click the start menu locate GlobalProtect from the list of applications:

The application will open a mini-box on the bottom right of your screen. Click "Connect".

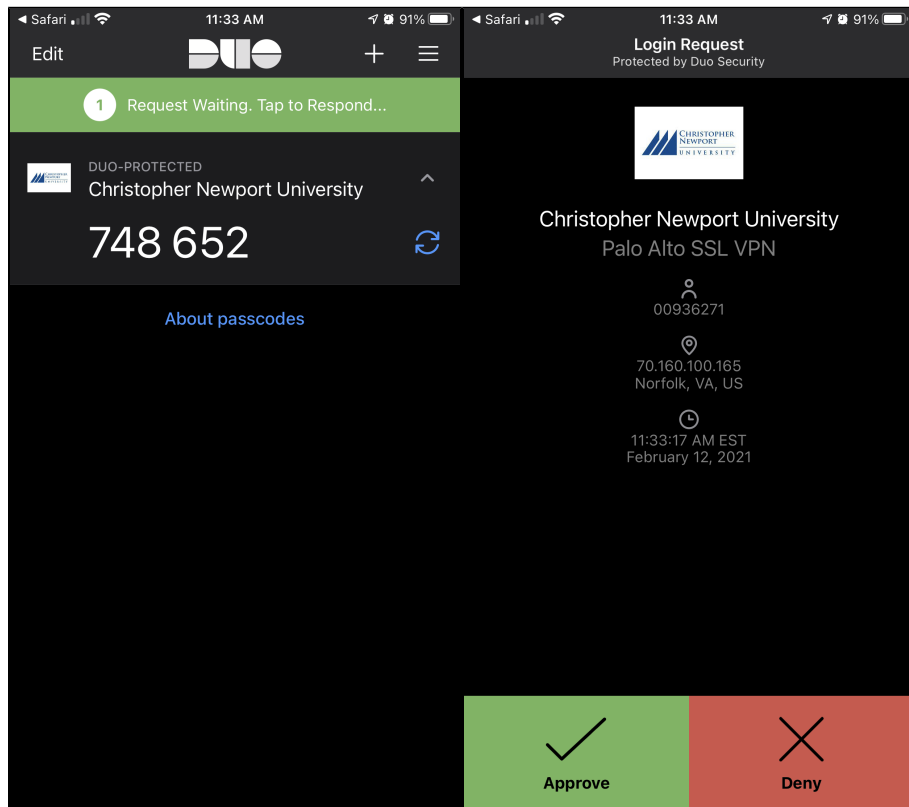

Enter your CNU username and password into the appropriate boxes, and enter gvpnp.cnu.edu into the "Portal" box. Then click "Sign In."

When you first log in, you may receive a prompt to confirm your security credentials via Duo Two-Factor Authentication. To set up Duo, see the article titled ["DUO Two-Factor Authentication Client Setup"](#). If you have already set up Duo on your mobile device, you will receive a notification of your login request.

open the DUO application on your device and open the login request. Select Approve to allow the VPN to complete the connection.

You will see this icon in the bottom-right corner of your screen if you are connected:
